The new craze for "raw water"

For \$6/gallon, Live Water offers unfiltered, untreated spring water to optimize physical and mental health. To learn more visit their [website](#)

America's Rivers are Getting Saltier
Salinization of stream systems and aquatic systems in general is just starting to emerge as a really big problem that has gone unrecognized for decades. In the Northeast, road salt is believed to be the biggest contributor. Read more [HERE](#)

Rivers and Roads

Intuitively, it makes sense to take debris out of a stream, but TS Irene taught us that this works against us. Debris slows down the water and reduces its force. That helps our roads. Learn more in [this video](#)

Feb 15 - 5:30 PM

The Worthy Kitchen - Woodstock

We'll discuss several legislative initiatives, and learn more about the new take on carbon pricing known as the [ESSEX Plan](#) that aims to accelerate the transition to a clean, largely local, renewably powered future. Most importantly, we'll clarify the opportunities to engage and act on the knowledge we have about the problem and the solutions.

Pastures for Horses

The Wet and the Weedy

March 1 (Thurs) 5:30-7:30PM

Strafford Saddlery, Quechee, VT

Ever wondered why the field that was lush in June looks bedraggled and full of weeds by September? Why that little patch of bindweed or burdock seems to get bigger every year? And what about those buttercups? More every year that's for sure!

And what's all this stuff you hear about that RAP business? Will it affect you and your horses? Cost you money? Mean that someone will be telling you what to do on your own land?

"Of winter's lifeless world each tree
Now seems a perfect part;
Yet each one holds summer's secret
Deep down within its heart."
~Charles G. Stater

"A small pine tree grown in a glass box reveals the level of white, finely branched mycorrhizal threads or "mycelium" that attach to roots and feed the plant and hold the soil.

Is the [future](#) of maple syrup in danger??
